SAMPLE: CAT Perspective Practice

One-point perspective

Draw a horizon line across the middle of your page.

Place one vanishing point at the centre.

Draw five rectangles of different sizes above and below it.

Connect every corner to the vanishing point, then close the boxes.

Two-point perspective

Place two vanishing points far apart on the horizon.

Draw one vertical line - that is the nearest corner of your building.

From its top and bottom, draw lines to both vanishing points.

Add two more verticals to close the left and right walls.

Daily 15-minute warm-up

20 ellipses, 20 straight freehand lines, 10 cubes, 5 cylinders.

Do this before every drawing session. Line quality is the first

thing an examiner notices.
